Tutorial

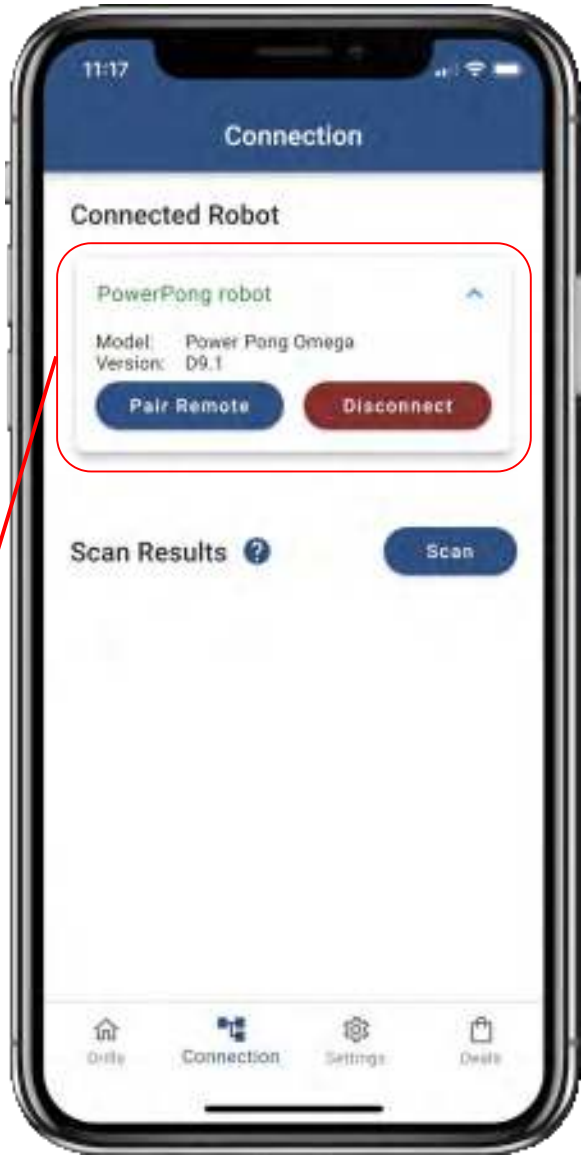

Navigate through tutorial by swiping or using the arrow

Connect to Robot

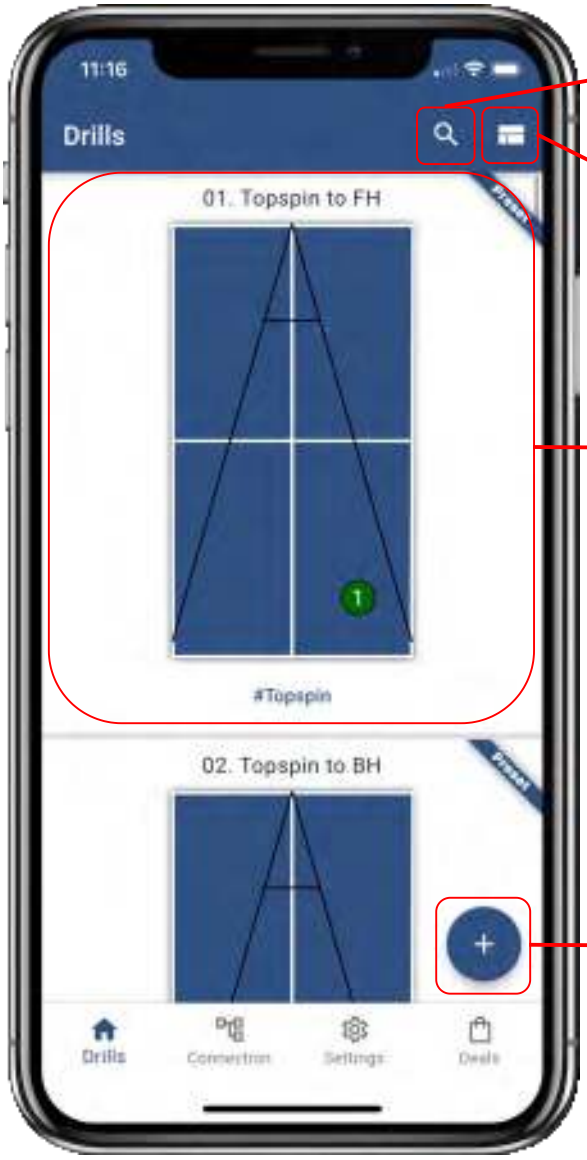

Tap on scan result to connect to robot

Once connected, info about robot will be shown here

View All Drills

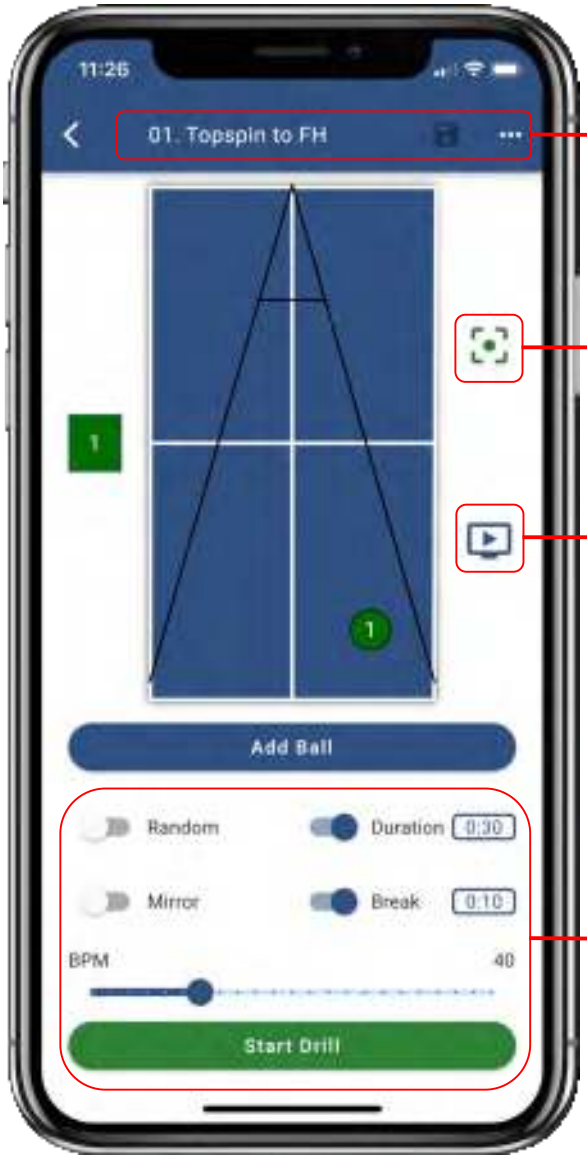

Search for drills by tag, name, or group

Switch to group view

Drill overview - long press to multi-select or tap to see drill details

Create a new drill

Edit Drill

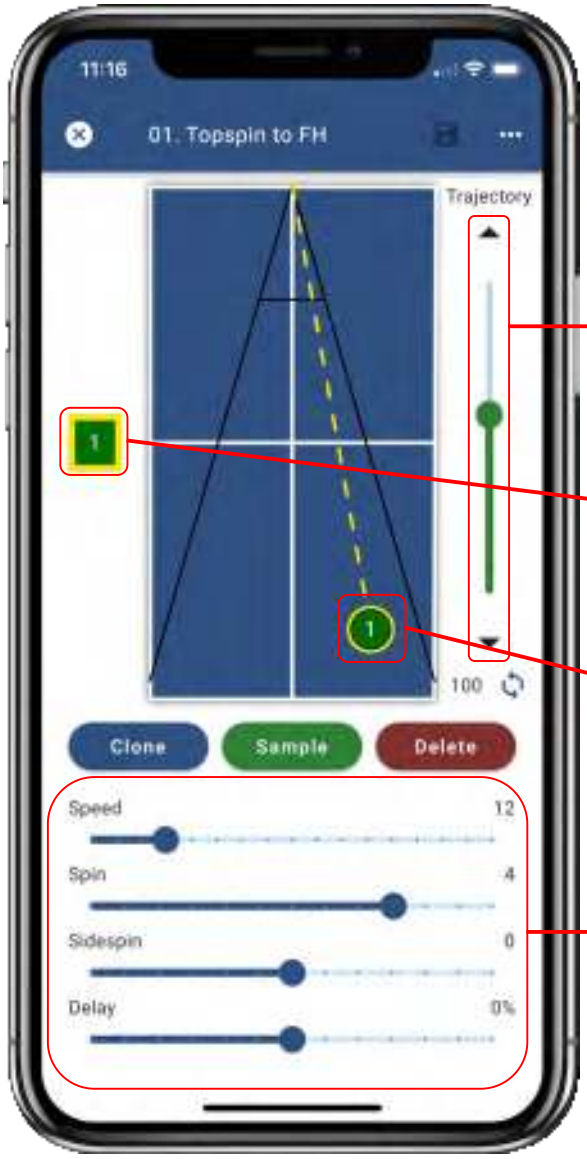

Drill title bar - edit name, save / discard changes, or see additional drill actions

Reset robot head position

Open a video demonstration of the drill

Set parameters for the entire drill

Edit Ball

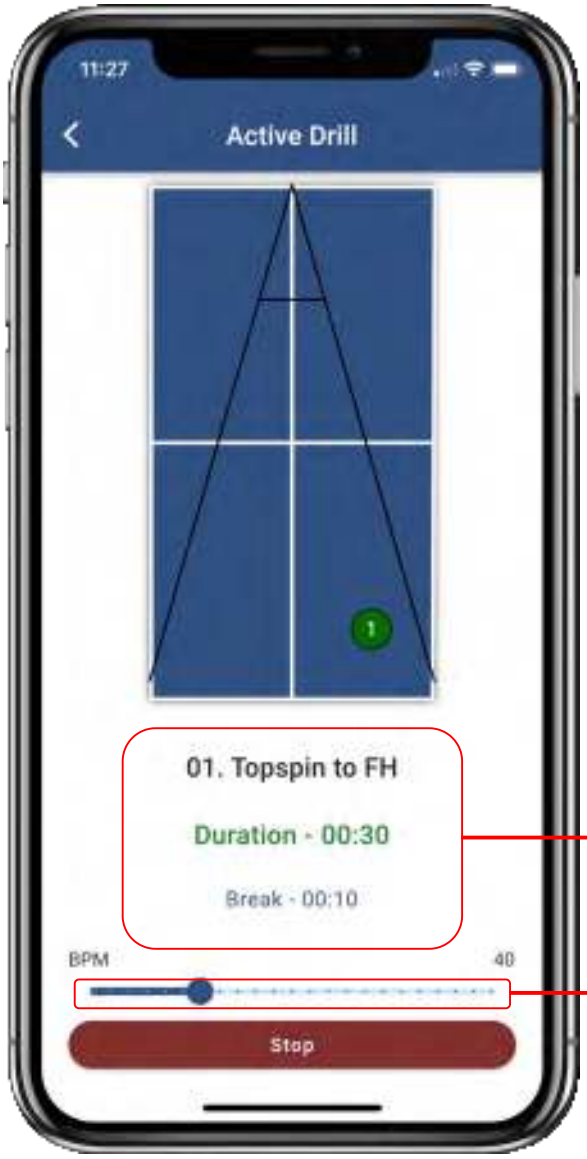

Modify trajectory - an estimated value is calculated for convenience, but can be manually adjusted

Shows currently selected ball and its order - with multiple balls, drag to change order

Drag the ball on table to change its position

Set other ball parameters

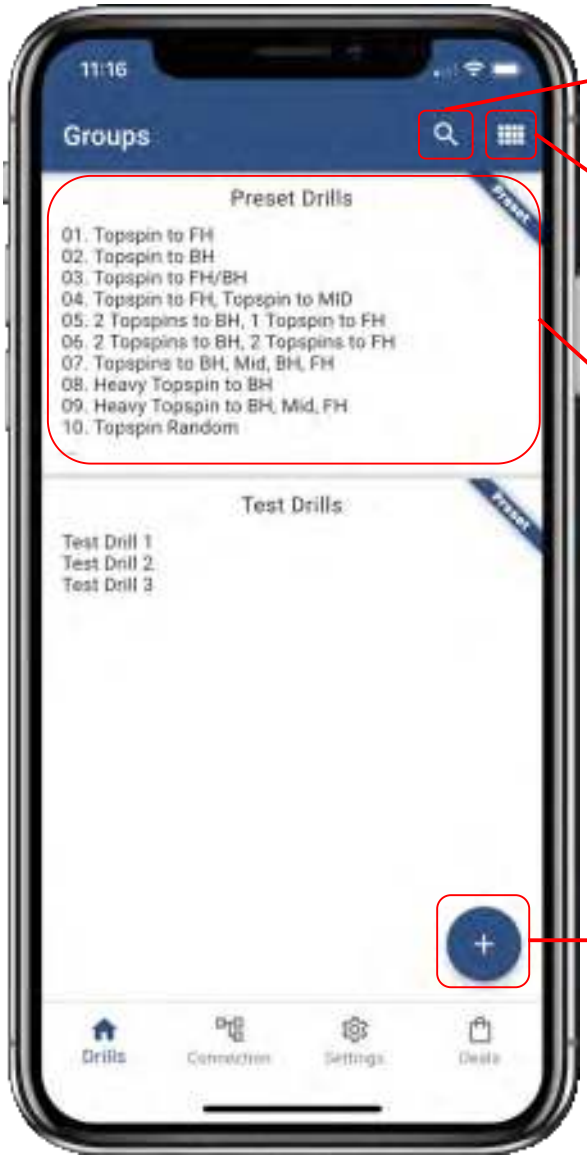

Play Drill

Current drill information with duration and break timers

Adjust BPM of the drill as it's running

View All Groups

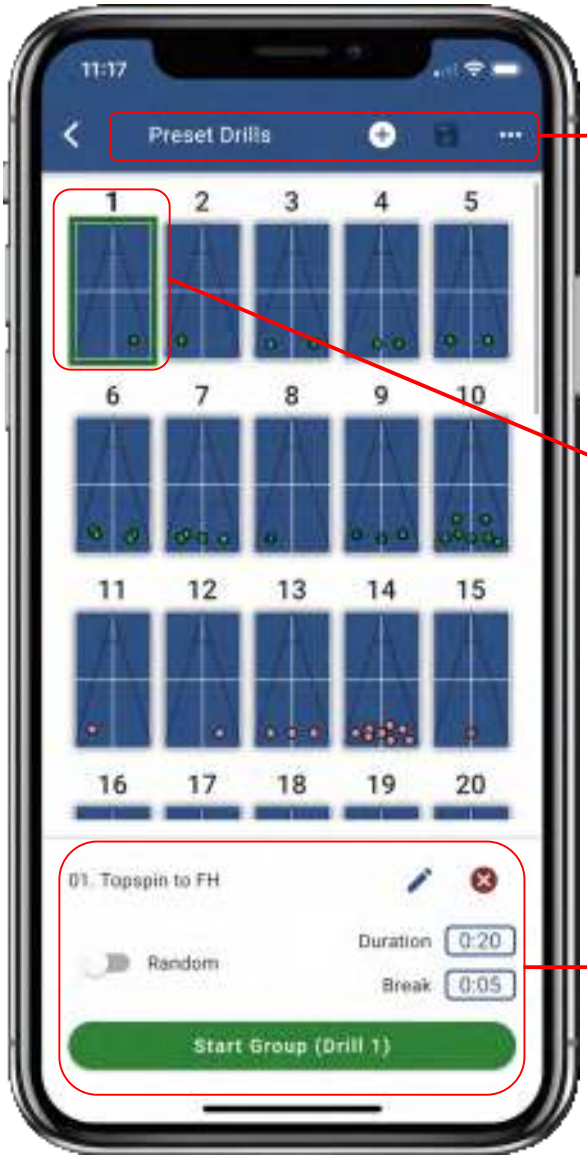

Search for groups using tags or names

Switch to Drill View

Group overview - long press to multi-select or tap to see group details

Create a new group

Edit Group

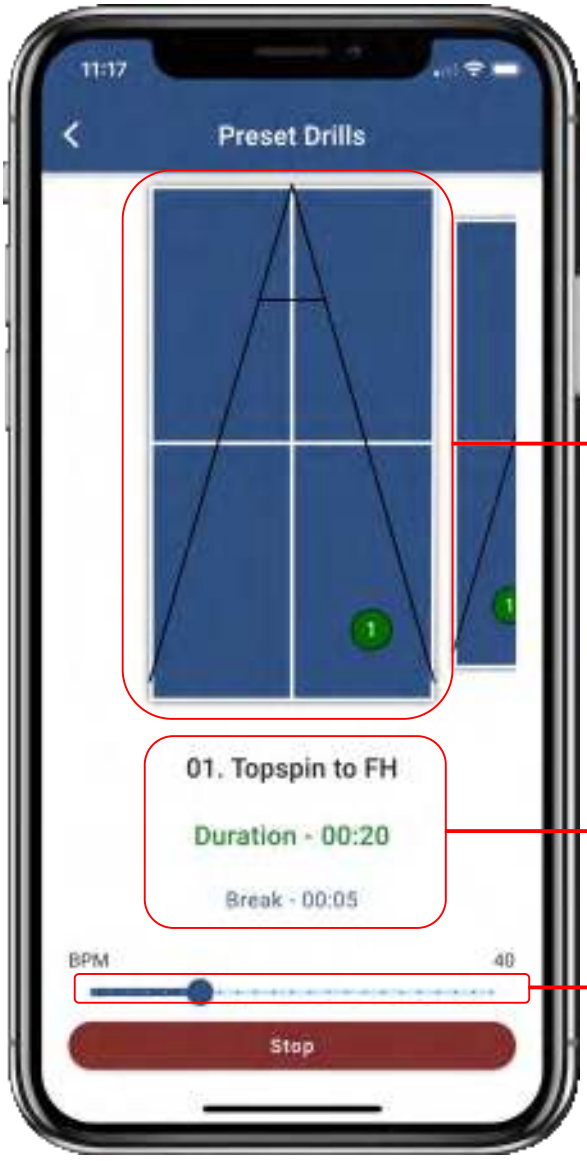

Group title bar - edit name, save / discard changes, or see additional actions

Currently selected drill - long press to rearrange the drill's order in the group

Modify drill parameters within the group

Play Group

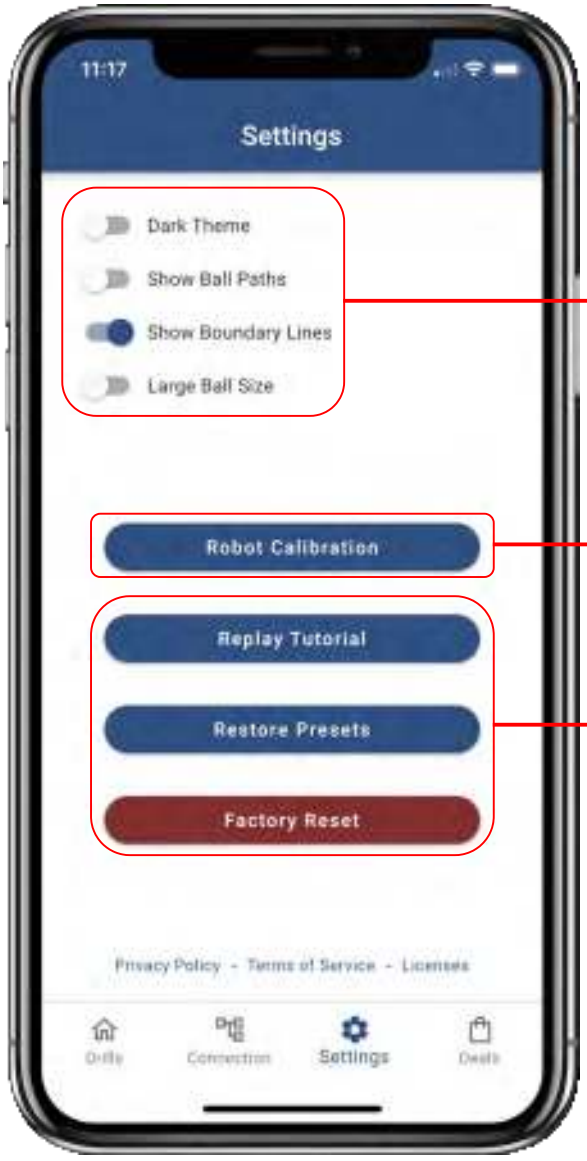

Currently playing drill

Current drill information with duration and break timers

Adjust BPM of running drill

Change Settings

Display settings

Perform calibration of the robot hardware

Global app actions

Sharing a Drill / Group

Long press to enable multi select - select additional drills by tapping

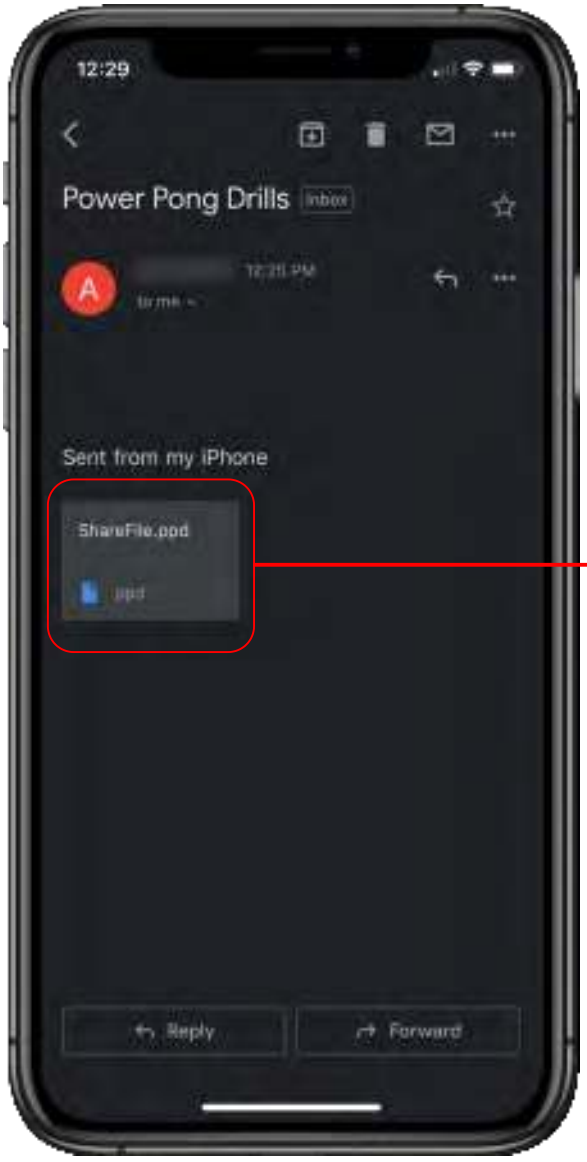

Open More Options menu and tap Share to begin sharing

Sharing a Drill / Group (cont.)

Choose how you want to share - we will use email here

Receiving a Drill / Group

Find and open the ShareFile sent to you - here, it is attached to an email

Receiving a Drill / Group (cont.)

After tapping on the ShareFile, send the file to the Power Pong application

Receiving a Drill / Group (cont.)
